

New Features
- LINUS Control v2.9 –

- 1. *New Features* 3
 - 1.1. LINUS Control compatibility to Windows 11 Version 24H23
 - 1.2. Optimised Limiter Operation for LINUS6.4.....3
 - 1.3. Global Standby.....3
 - 1.4. Improved Limiter Meter indication.....3
 - 1.5. LINUS6.4 Firmware v1.84
 - 1.6. LINUS12C Firmware v3.714

1. New Features

1.1. LINUS Control compatibility to Windows 11 Version 24H2

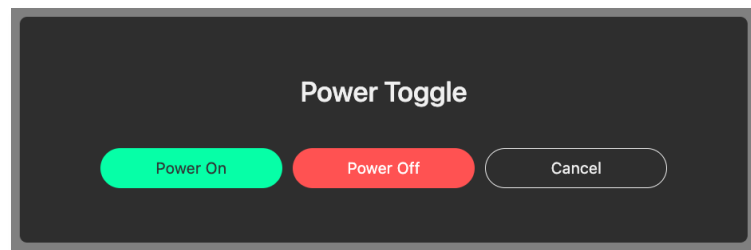

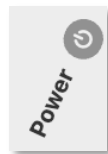

LINUS Control is now fully compatible with the Windows 11 Version 24H2

1.2. Optimised Limiter Operation for LINUS6.4

All speaker settings for LINUS6.4 have optimised limiter operation which ensure best system performance and protection.

1.3. Global Standby

Amplifiers which are suited with the standby feature can now be switched globally into standby or woken up. This feature is located in the "AMPS" view.

1.4. Improved Limiter Meter indication

Limiter meter indication of modules and in monitor view have been improved.

Logic for modules:

Gain reduction under 3dB no visual indication

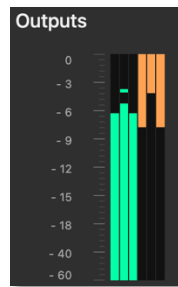

Gain reduction over 3dB orange meter indication

Logic for monitor view:

Gain reduction always indicated in orange and with improved scale

1.5. LINUS6.4 Firmware v1.8

- Fix firmware hangup that could occur in rare cases
- Display: Indicate Power Off while device is shutting down
- Display: Limiter meters show orange when gain reduction is ≥ 3 dB and red when gain reduction reaches 10dB
- Display: Fix text overlapping icons

1.6. LINUS12C Firmware v3.71

- Fixed device MAC address

IMPORTANT

Due to essential component update on the LINUS14 / LINUS14D and LINUS12C amplifiers, no backwards compatibility to firmware versions older than V x.69 is possible.

Affected amplifiers starting with this serial number:

LINUS14/ D: 19030863

LINUS12C: 21090214

Please refer do document "LINUS Control v2.9 Known Issues " for further information

Product	Firmware Version
LINUS6.4	V1.80
LINUS 14 / LINUS14-D	V3.70
LINUS12C	V3.71
LINUS10	V2.70
LINUS10-C	V5.70
LINUS5-C	V5.70
LINUS CON	V1.70
