plifier. The integrated control electronics include an optical limiter, 24 dB phase-aligned crossovers and EQ to provide a perfect match between amplifier and loudspeakers for optimum acoustic output and reliability.

The incorporated high pass crossover output (80 Hz or 125 Hz) enables easy integration of the top cabinets without additional external processing. The high power long excursion dual 15" woofers provide powerful and extended low frequency response with immense headroom.

The use of high efficiency class D amplifier ensures small size, reduced weight and superb sonic performance. Low port compression and optimized enclosure design give a tight, accurate bass response that is ideally suited to supplementing all Coda Audio full range enclosures.

Applications include bands, touring PA-systems or permanent installations.
