Power amplifiers

- Digital power supply with large power reservoir giving extremely high peak power without any bass 'sag'
- Proprietary designed progressive switching rail output
- Full high frequency power - the C-Series amplifiers will deliver their power over the entire audio bandwidth.
- Lightweight aluminum construction.
- All new low distortion limiters with adjustable threshold points for extra speaker protection.
- Sophisticated power control system linked to both the limiter and the power supply, keeping the amplifier within its operating limits at all times.
- Power Reduction Circuit (PRC) controls on rear panel, linked to the limiter threshold which allows each channel to be independently set so that different loudspeakers can be connected to each channel with safety.
- Soft start 'power on' with full in-rush protection.
- Full DC, short circuit and thermal protection, which automatically disconnects the outputs under a fault condition.
- Weighs around 11 kg.
- 5-year warranty.

Lightweight switchmode amplifiers designed to very high standards of reliability and sound quality. Intended for touring and fixed installations in a 2U chassis the range

consists of three amplifiers: the C25 delivers 2 x 1250 W at 4 Ohm, the C45 2 x 2250 W at 4 Ohm and the C475 4 x 800 W.
