

CODA Audio is a leading developer and manufacturer of high-quality loudspeaker systems with locations in Hanover (DE), Richmond (USA), Sofia (BG) and Worcestershire (UK). As well as the loudspeakers themselves, our product range comprises the entire chain of signal transportation, processing, amplification and cabling for all sizes of system. All our hardware is built from component level, in-house. We are internationally represented, and our products hold a number of patents. Whether in a concert hall or on a large open-air stage, sound systems developed by CODA Audio set the standard with regard to performance and playback rendering, consistent with our motto: Hearing is believing.

Our Development Department is currently expanding our product lines and upgrading our current platforms. As a result, we are currently seeking a:

Frontend Designer & Developer UI/UX, Angular, TypeScript (m/f/x)

Your responsibility:

- You will be part of the international CODA Audio R&D team at our HQ in Hannover which takes care of the UI/UX design for graphic representation, especially of CODA's softwares: System Optimiser, LINUS Control and SPACE HUB
- You will be responsible for the day-to-day frontend development of our softwares
- You will create UI/UX designs and translate them into actual code
- You will also work on the frontend of web portals for our distributors and customers
- You will work closely with our end-users to collect feedback and maintain our market leading workflow

Your talent:

- You have in-depth knowledge of HTML, TypeScript, SCSS/LESS, Angular v14+
- You have a knowledge of modern development practices like Git, CI or Tests
- You have a talent for modern, responsive design and a strong user focus
- Ideally, you have a UI/UX design-related degree, a degree in computer science or possess comparable skills
- You have experience in UI/UX design
- You possess good knowledge in the fields of Angular, TypeScript and modern development technologies
- You are interested in the areas of loudspeakers / audio / music
- You are user-focused and enjoy customer interaction
- You have a pragmatic hands-on mentality and are willing to roll up your sleeves to get things done
- You can communicate effectively in English

What we offer:

- You can expect an interesting and diverse workload in an international company
- You will enjoy a varied and challenging role in a multinational company with flat hierarchies
- You will work in a dynamic team with passion for new audio technologies
- You will find a pleasant working atmosphere within a 38-hour working week, attractive salary, and good development opportunities

If you would like to be part of our innovative team, and you are interested in learning about an attractive industry, please send a CV and covering letter by email to Mrs. Schaefer at:
