

CODA Audio is a leading developer and manufacturer of high-quality loudspeaker systems with locations in Hanover (DE), Richmond (USA), Sofia (BG) and Worcestershire (UK). As well as the loudspeakers themselves, our product range comprises the entire chain of signal transportation, processing, amplification and cabling for all sizes of system. All our hardware is built from component level, in-house. We are internationally represented, and our products hold a number of patents. Whether in a concert hall or on a large open-air stage, sound systems developed by CODA Audio set the standard with regard to performance and playback rendering, consistent with our motto: Hearing is believing.

Our Development Department is currently expanding our product lines and upgrading our current platforms. As a result, we are currently seeking a:

## Software & Application Support (m/f/x)

### Your responsibility:

- You will be part of the international CODA Audio R&D team at our HQ in Hannover, which takes care of CODA's softwares and applications, with a focus on System Optimiser, LINUS Control and SPACE HUB
- You will be responsible for finding and solving application and system issues
- You will work closely with our end-users to collect feedback, handle their requests, and offer application support
- You will test new software releases and report bugs, reproducing and removing them
- You will also be responsible for regular updates and adaptations of existing user manuals for software

### Your talent:

- You have a background and experience in audio technology and acoustics / PA
- Ideally you have a degree in sound engineering, computer science or possess comparable skills
- You are interested in the areas of loudspeakers / audio / music
- You are user-focused and enjoy customer interaction
- You have a pragmatic hands-on mentality and are willing to roll up your sleeves to get things done
- You can communicate effectively in English

### What we offer:

- You can expect an interesting and diverse workload in an international company
- You will enjoy a varied and challenging role in a multinational company with flat hierarchies
- You will work in a dynamic team with passion for new audio technologies
- You will find a pleasant working atmosphere within a 38-hour working week, attractive salary, and good development opportunities

If you would like to be part of our innovative team, and you are interested in learning about an attractive industry, please send a CV and covering letter by email to Mrs. Schaefer at:
